

# Vario D2 – Bannerdisplay

vario d2 one-sided

vario d2 two-sided

vario d2 centre position

## Product specification:

The successful trio converts textile digital printings into an advertising highlight. Base plate, support and grooves are the three system components that make up this attractive display. Set-up is simple: the grooves are inserted into the hemstitches of the printed fabrics. With the help of the tension jack at the bottom groove, the textile banner is smoothed out.

Three versions are available: with one support and a one- or two-sided banner or with two supports and a centred banner.

Its light weight and easy set-up make Vario D2 an important standard display system.

## Covering:

Can be used with a wide range of materials including textiles, tarpaulin, vinyl mesh and flag fabric materials.

## Sizes:

Height of props: approx. 2010 mm plus cone, length of grooves: 850 mm for the one and two-sided display and 1600 mm for displays with two supports.

## Sample displays:

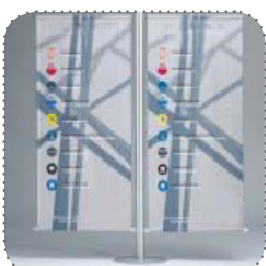

## Accessories:

Easy assembly

Base plate and support

Two-sided variant
